## EDUCATION

### University of Michigan

Bachelor of Science in Engineering - Data Science

GPA: 3.61/4.00

Relevant Coursework: Data Structures and Algorithms, Web Systems, Computer Organization, Intro to Data Science

Ann Arbor, MI

May 2026

## EXPERIENCE

### University of Michigan Nuclear Sciences Department

Research Assistant

Ann Arbor, MI

September 2023 - May 2024

- Led a collaborative effort to develop an immersive **virtual reality** game aimed at teaching nuclear safety to students, leveraging **Unity** and **Oculus Quest** for an engaging learning experience
- Incorporated advanced **Uptale** technology and 3-D cameras to create a high-fidelity extended reality environment, significantly enhancing **interactive** learning
- Developed and optimized **C#** scripts, reducing system latency by **30%** and improving **responsiveness**, facilitating a more **effective** educational tool

### Institute of Electrical and Electronics Engineers

Student Volunteer

Chicago, IL

July, 2023

- Assisted in planning and execution of the annual (2023) **IEEE** International Conference, **coordinating logistics** on **room monitoring** to support the conference with over **600** attendees
- Cultivated a **global** professional network by engaging with experts in the IEEE conference **from over 30** countries, deepening knowledge in current **software engineering** and **services computing technologies**

## PROJECTS

### MatchaBot

August 2024

- Developed a Discord bot, 'Matcha', utilizing **Python** and **discord.py** library, enhancing server interaction and providing high quality music playback with **FFmpeg** and **YoutubeDL**
- Enhanced community engagement by **40%** through the integration of **OpenAI GPT-4**, enabling users to dynamically interact in **real-time** directly within Discord to over **20,000** active users

### InstaShare

August 2024 - Current

- Developed "InstaShare", a dynamic social media application, utilizing **React**, **HTML**, **CSS**, **Python**, and **Flask**, emphasizing features such as user registration, content management, and social interaction to boost user engagement
- Optimized web application performance and scalability on **AWS ECS** by implementing **AJAX** calls with **TypeScript** to a **REST API** and refining **SQL** data management, leading to more efficient user interactions and increased application responsiveness, enhancing overall performance by **20%**
- Ensured **robustness** and reliability of "InstaShare" with comprehensive testing with **Cypress**

### AppointmentApp

May 2024 - Current

- Integrated an appointment scheduling system with **Swift** and **SwiftUI** for **JP Foot Spa**, enhancing client flexibility in booking, modifying, and canceling appointments through an intuitive interface
- Implemented a real-time **Supabase** database to synchronize data across multiple devices, ensuring accurate and timely updates that improve operational efficiency for both customers and employees
- Reduced the time required for clients to schedule appointments by **50%**, alleviating the need for the owner to interrupt services for phone reservations, enhancing both client satisfaction and operational workflow

## SKILLS

**Languages:** C++, Python, Java, Javascript, TypeScript, React.js, HTML, CSS, Swift, SwiftUI, SQL, C#

**Tools/Frameworks:** Git, Supabase, Pandas, Docker, Discord.py, Jinja2, Flask, REST, AWS, Bootstrap
